

Warehouse Management Platform

Omnichannel workflow for maximum flexibility

The industries most flexible warehouse management system for omnichannel businesses. All in one cloud platform with the industries first workflow platform making it easy grow.

JASCI SaaS Warehouse Management

Powered by SmartTask Workflow

The industries most flexible warehouse management system for omnichannel businesses. All in one cloud platform with the industries first workflow technology making it easier to implement, optimize and grow.

SaaS is a method of software delivery that customers pay a monthly subscription and access JASCI over the internet. We take care of everything else.

No more upgrades needed, as JASCI is continuously updated with new features that can be accessed by customers.

Modern integrations and API's with ERP's, webstores, shipping carriers makes on-boarding easier than ever.

- ✓ Omni-channel warehouse management for B2C & B2B
- ✓ Rapid on-boarding with ease of implementing
- ✓ Multi-company, multi-location & multi-lingual
- ✓ Built-in labor management
- ✓ Automation smart with Robotics & MHE equipment

Gartner

Gartner® Names JASCI in mid-market Quadrant™ for Warehouse Management Systems

What is a SmartTask Workflow

SmartTask is the industry's first workflow designer using a drag and drop micro-services toolkit to automate wall to wall fulfillment in the warehouse, directly within JASCI, our cloud-based software logistics platform. Workflows can be easily tailored without expensive and time-consuming coding projects to optimize warehouse process.

JASCI has created dozens of best practice SmartTask workflow templates for omni-channel warehouses that specialize in 3PL, ecommerce, wholesale, retail & manufacturing. Templates can be tailored to match your business requirements.

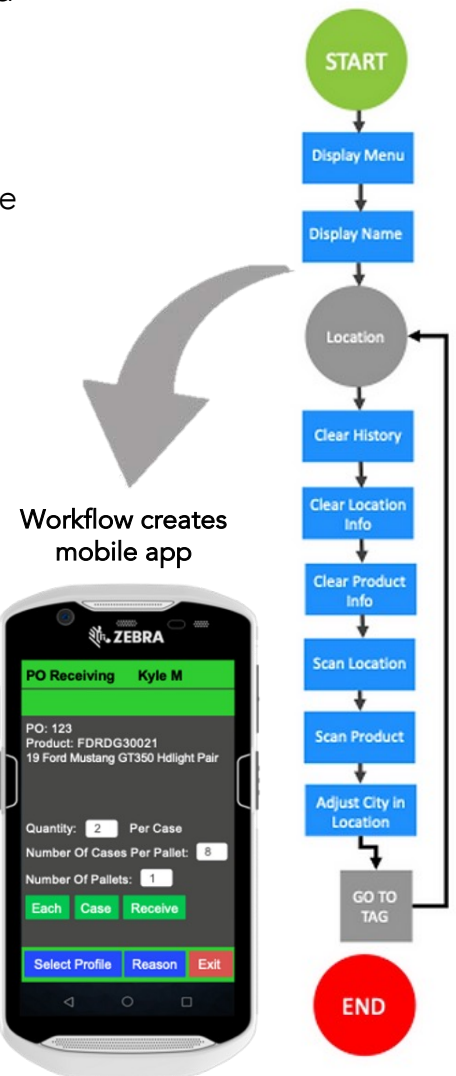

Old Way

Time consuming and expensive process

New Way

Modern micro-services makes changes easy

Workflow creates mobile app
